*Plaster Mouldings and Restoration Specialists*

Ph: (01) 836 6065 Email: [info@plasterwork.ie](mailto:info@plasterwork.ie) Web: [www.plasterwork.ie](http://www.plasterwork.ie)

Workshop and Showrooms:  
Unit H  
Croke Park Industrial Estate  
Russell Street, Dublin 1

## The Restoration Specialists

From the restoration of Powerscourt Townhouse, The Shelbourne Hotel, to the re-instatement of the Academy in Pearse Street our attention to detail is second to none. We have worked alongside and are recommended by the finest Plaster Restoration Conservation Architects in the country

We have carried out Plaster Restoration Countrywide, in some of the finest stately homes, Museums and also to numerous more modest houses, where restoration or upgrading is taking place.

We can match any existing plaster design or indeed replicate from Photographs or drawings.

Plaster Restoration is a very specialized area of expertise and all our Craftsmen are fully trained to City and Guilds standard.

## Consolidation

As well as restoring plasterwork, we can also consolidate existing Plasterwork which may be loose or unstable, using a Method perfected by ourselves.

We also offer a paint Cleaning service, involving the removal of multiple layers of Paint that often clog up decorative enrichments and mouldings, and restore them to their former glory.

Our managing director Frank Newman taught Plaster Restoration in Bolton Street College in Dublin before setting up the company in 1988.

We have worked for most major Contractors and Architects on numerous Plaster Restoration projects and would be happy to give an estimate for work large or Small.

---

## James Joyce Cultural Centre

Exact reconstruction of two 18th century ceilings from photographs, consolidation and restoration of decorative ceiling, restoration of cornices and friezes

“While here, you can also admire the fine plastered ceilings, some of which are restored originals while others are meticulous reproductions of Dublin stuccodore Michael Stapleton’s designs.”

# GRC ARCHITRAVES

GRC or glass-reinforced cement, can be used inside or outside where a hard wearing product is required. It is lighter than concrete products but can be reinforced if required to carry weight. We can produce a finer detail with GRC than with concrete products.

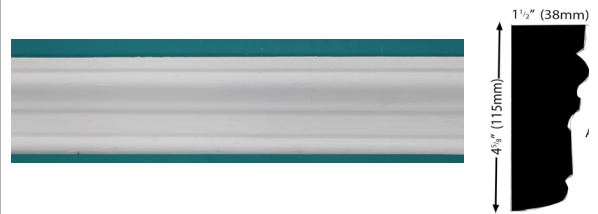

AR 1

P: 1 1/4" (32mm) | D: 4 1/4" (105mm)

AR 2

# OUR SERVICES

## Arches

Over the years Irish Fine art plasterwork have produced arches of all shapes design and sizes. Matching into existing or off the drawing board , there is no arch that we cannot produce. Often accompanied by our standard , corbels, pilasters or columns our arches can transform a room.

## Ceilings

Since being formed in 1988 Irish Fine Art Plasterwork have been involved in many projects involving the creation and restoration of various types of ceilings.

These vary from recreating decorative ceilings from drawings or photographs to forming vaulted or pattered ceilings from architects specification. We also specialize in taking in-situ moulds from existing ceilings to be reproduced to match existing.

## Columns

Our columns come in a variety of sizes and designs and we have a range of standard Column and Pillaster mould's that we can produce in Plaster or G.R.C for use both inside or outside.

We can make up column's to any design, size or specification please contact us at 01-8366065 or email [info@plasterwork.ie](mailto:info@plasterwork.ie) to discuss your requirements.

## Glass Reinforced Cement

Anything we can make in Plaster we can also make in G.R.C. This is a cement based material that can be used outside or inside, where a hard wearing product is required. We use our standard mouldings, or can match existing or originate from drawings or photographs. It is lightweight compared to concrete products which is a bonus where load bearing is concerned, but it can also be reinforced if it needs to carry any weight.

## Lighting Troughs

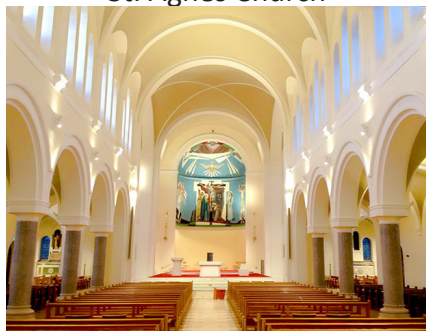

Plaster lighting troughs are a unique, cost efficient way of hiding lighting while directing it towards the ceiling, usually accompanied by a cove reflector. Any of our standard range of cornices can be cast as a lighting trough or we can manufacture any design or shape. The method of casting is slightly different from conventional cornice to ensure a true line at the top, and fixing can vary depending on the cornice chosen and lighting required.

# PORTFOLIO OF WORK

St. Agnes Church

Restoration of plaster cornices and staff beads and the forming of arches and vaulted ceilings

3 Henrietta St, Dublin 1

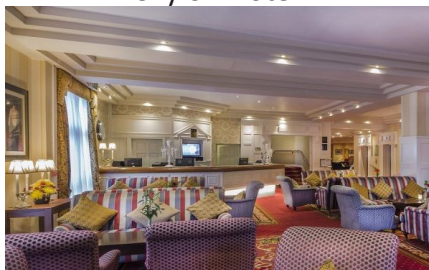

Extensive restoration of one of the finest Georgian buildings in Dublin involving consolidation of all the main ceilings and restoring all the decorative cornice.
